5. Conferences, Workshops, Background Papers, and Series .	20
6. Bibliographies .....	20
7. Mimeographs .....	21

PREFACE

In the intellectual world the compilation of research bibliography is not generally considered as a scholarly enterprise. In my personal opinion such works are best judged in terms of their usefulness and service to the scholars who need them. My primary objective in compiling this bibliography is to achieve that goal.

In the past two or three decades every school, college, research organization and/or agency, and public library has had increasing demand for reference materials dealing with family planning programs. This bibliography is intended to make the task of selection easier. It contains some 250 selected references published chiefly during 1968-1973. The references listed in the bibliography are by no means definitive, nor are they meant to be, but they represent many of current publications which may be used as guides for further research pertaining to this subject.

The present bibliography is divided into Seven Sections: Section One contains listing of books and monographs, Section Two is a listing of research articles appearing in the journals and periodicals, Section Three contains reports and research reports, Section Four includes proceedings, Section Five lists conferences, workshops and background papers, etc., Section Six present bibliographies and Section Seven is a listing of mimeographs.

The main sources of compilation of the bibliography were local, regional, national and international journals and/or periodicals and books reporting research findings on the subject matter of family planning programs. The reference listings in each section are arranged by the author in alphabetical order when possible.

A number of persons deserve my thanks for their help with this compilation, without whose cooperation this work would not have been possible. I especially wish to thank Mrs. Hershel Marks for typing the bibliography. I would also like to thank Mrs. Mary Vance, Editor, Council of Planning Librarians, for her encouragement, editorial assistance and for the financial assistance from the Council that partially supported this work. The sole responsibility for any errors and/or omissions is mine.

This bibliography will be handy and it is my hope that teachers, researchers, librarians, research organizations, family planning clinics, and others needing assistance in this field will find this guide a useful, informative, and valuable instrument.
